No cost to the public safety agency, because they already possess the access control device [KEY]— Their own radio transceiver.

Don't risk untimely delays during an emergency response. Every second counts so forcing the emergency responder to STOP their vehicle to enter a code, activate a key, or not get in at all can have a catastrophic outcome.

Operate both gates and doors for a comprehensive overlay emergency access response.

Features and benefits of the NEW Click2Enter-I.V4:

- ★ Mutual Aid Control
- ★ Stealth Operation
- ★ Improved Response Time
- ★ Officer Safety Friendly
- ★ Provides Increased Security Over Light & Siren Systems
