INSTALLING THE MOUNTING ACCESSORY

1. Using the mounting accessory, mark and drill the necessary holes in the mounting surface. The wall mount bracket must be attached to a structure such as hardwood, wall stud, concrete or a suitable material capable of supporting the final mount assembly.
2. Attach the wall mount bracket to the structure using the plastic anchors and tapping screws (PTS1 M6x40L) as illustrated in the figure.
3. Pass wires through the mounting accessory's access window, located on the bottom of the bracket.
4. Secure the camera to the wall mount using the safety wires and make the necessary connections to the camera. See the camera's manual for more information.
5. Use the machine screws included with the camera to attach the camera to the mounting bracket.
6. Once the camera is mounted securely to the mounting accessory, complete the installation by securing the camera's dome cover back on.
