

EyezOn: Envisalink 4

Take Control of your Alarm

The new **Envisalink 4** is a powerful TCP/IP based interface to DSC PowerSeries* panels and Honeywell Vista* panels. The **Envisalink 4** is the perfect way to turn your existing security system into a “smart” security system. It allows you to view the status of, and control your alarm system through a standard web-browser or smart-phone. You will also receive alerts via email or SMS of events in your home or office. All this with **NO MONTHLY FEES**.

Fully Upgradeable

As new software features become available, **Envisalink 4** is easily upgraded over the network and automatically kept up to date.

EnvisAlerts Service

With the free **EnvisAlerts** service, you can notify up to 30 different contacts of events in your home like arming, disarming, and alarms. You can get an SMS text message when you child comes home from school, or have you and your neighbors notified when your alarm goes off.

Module Features

- Remotely upgradable to allow for new features and services
- **Envisalink** TPI: Developer and Integration interface
- **Envisalink** Expansion Header: Add new hardware modules as they become available
- Simple to hook-up
- Built-in basic web server and html user-interface
- 128-bit encryption
- Real-time zone status with “time-since-tripped ” feature
- Local Arm/Disarm/Zone Bypass/PGM Control
- Multi-Partition Support

Additional Features With Free **EnvisAlerts** Service

- Remote Arm/Disarm/Zone Bypass/PGM Control
- Event Logging
- Alerting by e-mail or SMS
- Network Supervision
- See at a glance system status on a map in the EyezOn portal
- Mobile Portal optimized for iPhone, Android, and Blackberry. Control your alarm through your smart phone

Additional Features

With **EnvisAlarm™** Service

- Option of full-ULC grade alarm monitoring over **Envisalink 4**
- Best price in the industry for full IP-Based monitoring
- Monthly, 1 Year and 3 Year terms available
- Receive monitoring certificate and take advantage of Insurance Company Discounts

Plays Well With Others

Through the built in TPI (third party interface) the **Envisalink 4** is compatible with many major home automation systems and numerous 3rd party Android and iPhone apps.

Specifications

- Panel Powered: 9-14Vdc
