Introduction

GV-VR360 is a Virtual Reality IP camera made true with two 4 MP fisheye panoramic cameras. The camera provides a live view of the surveillance area with an all-inclusive 720° angle range of view and extended depth of field, enabling a total coverage of wide-open areas. When streamed online or viewed through the GV-Eye or YouTube mobile app, users can watch the 720°, VR video from the camera for an immersive experience. Equipped with IR-cut filter and IR LEDs, GV-VR360 is capable of day and night surveillance under contrasting illumination conditions. Utilizing H.265 video codec, the camera allows better compression ratio while maintaining high image quality at reduced network bandwidths. The camera adheres to IK10 and IP67 standards.
