Press RESET about 10s when the camera is powering on or rebooting to restore the default settings, including the user name, password, IP address, port No., etc.
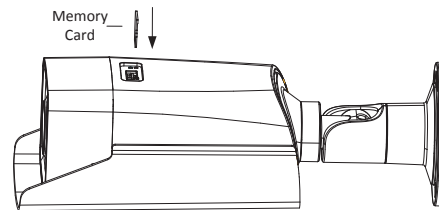

Installation Steps:

1. Memory Card Installation

1)Loosen the two lock screws and remove the slot cover.

Slot Cover

2)Insert the memory card into the memory card slot.
3)(Optional) To unmount the memory card, push to get it ejected.
4)Screw the slot cover back to the camera.

Memory Card

2. Direct Mounting
Drill 4 screw holes (hole 1 on drill template) and the cable hole in the ceiling/wall.

Ø88.5

Drill Template

Ø36

A

Hole A : for cables routed through the wall
Screw hole 1: for integrative bracket
Screw hole 2 : for conduit back box

3. Fix the camera to the wall/ceiling with the supplied screws.
Note:
Insert the expansion screws first if the camera is mounted to the cement wall/ceiling. Use the self-tapping screws directly if camera is mounted to the wooden wall/ceiling.

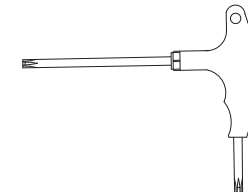

Wall   Ceiling
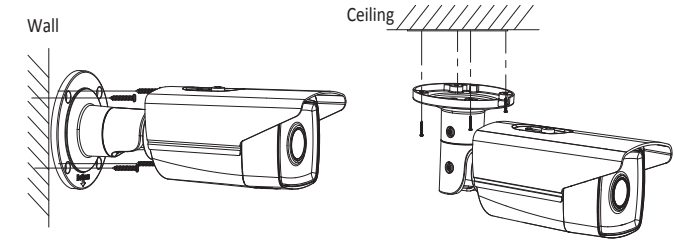

4. Adjust the surveillance angle.

1). Loosen No.1 lock screw to adjust the tilt angle [0 ° to 100°].
2). Loosen No.2 lock screw to adjust the pan angle [0° to 360°].
3). Loosen No.3 lock screw to rotate the camera [0° to 360°].
4). Tighten the lock screws.

0°~360°
0°~100°
0°~360°

Note:
A wrench is supplied to loosen and tighten the screws.

For detailed instructions of further configuration, please refer to the user manual of network camera.
