Features:

- Aluminum alloy with surface treatment
- Waterproof rubber designed for indoor / outdoor applications
- Outlet hole improves appearance
- Superior waterproofing design
- Matched junction box includes waterproof stopper

Parameters:

| Model / Parameters	LTB742-120
	Φ 120 Wall Mounting Bracket for Mini Dome Camera
Appearance	White
Range of Application	Suitable for dome camera wall mounting
Materials	Aluminum Alloy
Dimensions	4.72 x 4.8 x 6.8 in. (Φ 120 x 122 x 173.5 mm)
Weight	Approx. 1 lb (440 g)

Dimensions:

Notice:

- The bracket should be installed on a flat wall
- Waterproof rubber piece is necessary for outdoor applications
- The wall must be capable of supporting over 3 times the total weight of the camera plus the mount
- Maximum load capacity of mount is 9.9 lbs (4.5 kg)

Installation:

① Choose the appropriate wall and thread camera wire through mount aperture

A: Reserved hole for wiring
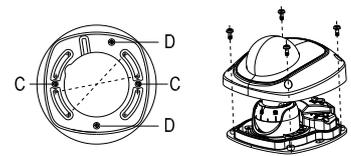

② Affix adapter to bracket and thread the wire

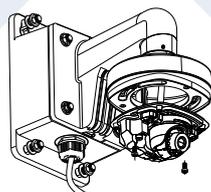

B: Tightening Screw

③ Screw adapter to wall

④ Remove transparent cover and align adapter with plate

⑤ Install the adapter to the bracket and screw together

⑥ Connect the camera wire and affix the camera to the adapter plate

⑦ Modify camera angle, install the transparent cover and screw together

⑧ Bracket installation is now complete.

Note: The actual bracket may vary from the picture above.
