

## **EPL-EMG-48-2L-Ballast**

### **EPL-EMG-48-2L-Ballast**

**Please see last page for supporting documentation for this product(certificates, CAD files & drawings, IES files, wiring diagrams, etc).**

**The EPL-EMG-48-2L-Ballast is the replacement ballast for our emergency two foot and four foot lamp fixtures. It operates with our T8 and T12 fluorescent bulbs.**

This universal input emergency ballast works in conjunction with an AC ballast to convert new or existing fluorescent fixtures into emergency lighting. The emergency ballast handles a wide range of input voltages and frequencies and consists of a high-temperature nickel-cadmium battery, charger and electronic circuitry in one compact case.

The EPL-EMG-48-2L-Ballast will run a single lamp at 900 lumens for 90 minutes. The light recharges the battery once standard electrical power is restored. The ballast can be mounted on top of the fixture or in the fixture wire way. This ballast can be used with our T8 and T12 fluorescent lamps.
